PORTA-BOTE™ Folds Flat!
World Class Folding Boats

READ WHAT THE EXPERTS SAY:

"...The folding Porta-Bote may be one of the best all-around fishing and hunting boats made! . . ."

Field & Stream

PORTABILITY

READ WHAT THE EXPERTS SAY:

"Porta-Bote passed every test with flying colors. Easily carried to the water by one person, the boat sets up extremely easily. Even when the open water got a little rough in the late afternoon, the Porta-Bote remained extremely stable." **HUNTING**

The "Take It Anywhere" Boat®

12 (3.85m) Model
Fits Atop The Smallest Com pacts

12 (3.85m) Model

8 (2.85m) Model
"Keep It In Your Condo!"

12 (3.85m) Model Shock absorbing Deep Keel "Flexi-Hull"®

READ WHAT THE EXPERTS SAY:

"Porta-Bote's keel, concave vee section bottom and chines dig in and give her much more directional stability than flat-bottomed inflatables. She's also a great deal more comfortable at speed in a chop than a rigid skiff or an inflatable. She doesn't bounce like an inflatable, and she doesn't pound like a rigid boat. The flexible polypropylene hull absorbs the impact." **SMALL BOAT journal**

Shown With Optional **BACK SAVER SEATS** **STABILITY**

INCREDIBLY BUOYANT

READ WHAT THE EXPERTS SAY:

"The material is durable - practically indestructible - and extremely buoyant. We rowed the boat even when full of water and found it more unsinkable than Molly Brown." **TRAILER LIFE**

12 (3.85m) Model

Row it Back To Shore . . . Full Of Water
Porta-Bote's Exclusive "Lifeguard Flotation System"®

Shown in Aluminum Color
12 (3.85m) Model

READ WHAT THE EXPERTS SAY:

"The 12' (3.85m) Porta-Bote may be one of the best all-around fishing and hunting boats made for the mobile sportsman. It's a pleasure to fish from. It's comfortable for sitting in, roomy for moving around and steady enough for stand-up casting." **Field & Stream**

Can You Pull Up A 100+ Pound (50 kg) Fish Into Your Boat?

Very early one dark and hazy morning on the River Seine in France. These two surprised fishing enthusiasts have just caught a 100+ pound (50kg) fish in their favorite folding boat! Of course, any boat can be capsized under certain conditions. But, Porta-Bote's wide beam FlexiHull give you more stability than a rigid aluminum or fiberglass hull. Notice how the man with the fishing rod is sitting on the other side of the boat for better balance.

DURABILITY

Japan's Coast Guard put Porta-Bote's "Flexi-Hull" through an almost unbelievable test to certify the strength of the patented polypropylene hinges. A production model was loaded with over 600 (272 kg) pounds of concrete weights. The craft was raised 20 (6m) feet above the water and dropped! Porta-Bote passed with flying colors and is now being marketed in Japan.

Incredible Japanese Hinge Strength Test

10 YEAR LIMITED HULL MATERIAL WARRANTY
Never Needs Painting - Incredibly Durable

Maintenance free! PORTA-BOTE is constructed of a High Impact POLYPROPYLENE-COPOLYMER, a remarkable hard, engineered resin originally developed for use in the aerospace field. This amazing material is resistant to sharp rocks or collisions—impervious to sand, salt, and acid. Nothing affects the molded-in color and finish! *This boat complies with U.S. Coast Guard safety standards in effect on the date of certification. **NMMA Certified.**

Porta-Bote Makes History

Porta-Bote was chosen by the British Royal Airforce Climbing and Rescue Team to be used in their record setting climb up Mt. Everest. At 20,000' (6150m) above the clouds they wanted to cross a glacial lake. Only Porta-Bote was able to pass their stringent test. Inflatables could be punctured. Ordinary craft were too heavy to carry up the side of Everest. Only puncture resistant Porta-Bote was able to be carried on the back of a Yak.

VERSATILITY

READ WHAT THE EXPERTS SAY:

"It turns quicker than any boat I ever tested – and without heeling over. It rows beautifully! It's polypropylene hull crawls over rocks without damage! It "slithers" over chop and wakes without the annoying bouncing of rigid craft." **Field & Stream**

Doesn't Take Up Valuable Interior Space In An RV.

Q. How "reliable" are the Porta-Bote hinges?

A. The Porta-Bote hinges have been time-proven for over 40 years by thousands of satisfied customers, worldwide.

Q. Why is Porta-Bote so much more stable than ordinary, rigid boats?

A. Flexibility. When a strong wave slams against the side of a Porta-Bote's "Flexi-Hull" the polypropylene flexes inwards.

Q. Why is the Porta-Bote hull constructed with Polypropylene and how durable is it?

A. Polypropylene Copolymer, an Engineered Resin, was developed by the Aero-Space industry. That's why we can offer a 10 year limited hull warranty.

Q. How puncture resistant is the hull?

A. The hull is almost 1/4" (.6cm) thick... twice as thick as an aluminum hull.

Q. Does Porta-Bote meet Coast Guard specifications?

A. YES! They exceed the latest compliance standards.

NMMA CE Certified.

The Unique Porta Deck® for Casting, Boarding & Scuba.

Utilized Around The World As A Reliable And Safe Dinghy

MAKES INFLATABLES "OBSOLETE"

READ WHAT THE EXPERTS SAY:

"Unlike inflatables, the Porta-Bote is ready to go in just a few minutes. At the crack of dawn when the trout are leaping out of the clear mountain lake . . . well, expediency is obviously of the utmost importance. Setup is a matter of unfolding the boat and inserting seats. Assembly is an easy one-person job."
